

VaxCon Warning System

Vaxcon is a warning system used to identify the current level of threat against the health and freedom of American citizens and America itself. (We're presently at Vaxcon 2)

Vaxcon 5

An experimental, genetically-engineered medical procedure is rushed to market without adequate testing under the title of “emergency authorization.” Vaxing everyone is the whole of the government’s plan to deal with the Covid crisis. What is being shot into people’s arms is not a vaccine, does not adhere to the standard parameters of a vaccine, and has not gone through the vigorous testing required for vaccine approval (to determine the long-term effects). It’s an experimental, genetically-modified agent that is being labeled as a “vaccine,” and likened to other vaccines—such as those that reportedly eradicated smallpox and polio—for promotion purposes. It is also being rolled out as a “vaccine” so that manufacturers can’t be held responsible or sued due to adverse reactions and/or deaths resulting from the shot.

Thus, an unproven and most-likely harmful agent is being mass-administered to the American public which admittedly does not prevent a person from contracting Covid-19 or spreading it to others. The only efficacy claimed is that it reduces symptoms related to the Covid-19 virus, for a period of 60 days, for the .05% of people who may come down with Covid. (Studies show that supplementing with aspirin and/or Vitamin D will be more effective at reducing severe symptoms than the shot.) The shot may reduce symptoms for a short period of time, only however, at the cost of debilitating a person’s robust immune system and making them more vulnerable to reinfection and all variants of the Covid-19 virus in the future. Several doctors have demonstrated that the “vaccine” causes a host of medical problems including micro-clotting in the brain, lungs, and arteries in over 60% of people who received the shot. The possible long-term, negative effects on the immune system and overall health are not known at this time but could be “catastrophic.” Even an originator of the mRNA technology is opposed the use of this technology in a widespread vaccine at this time. Doctors have given up on their oath of “Do no harm” and replaced it with “Get the shot.”

Vaxcon 4

The government remains aloof to all the contrary reports of the negative side-effects of the shot and keeps pushing through their vax agenda. Propaganda is the new norm. Millions of people are coerced, shamed, cudged, bribed, etc. into getting this experimental shot despite the massive side-effects (and deaths) being reported. Thousands of doctors protest the shot, saying it may be harmful in the short-run and may be tragically harmful in the long run. They are not anti-vaxxers, they are pro-vaxxers who insist on safe, fully-tested vaccines and not experimental procedures imposed on the American people. While growing amounts of information point to the short-term and potential long-term harm of the vax, the government continues to lie and misinform people saying that the vaccine is safe, even though they have no way of knowing this since it has not gone through any long-term testing. The government actively suppresses any voice of dissent with the help of big business and major media platforms. Every Facebook post mentioning vaccine problems or anti-vax material is accompanied by a note saying the vaccine is safe and “has gone

through extensive testing.” All those who dare to speak out against the “vaccine rollout” are threatened, silenced, blackballed, deplatformed, and/or discredited. The White House issues a hit list of “The Disinformation Dozen,” which is a list of the twelve top people who are spreading vaccine disinformation. Most of these people are doctors. The media does not address what these doctors have to say or the evidence upon which their positions are based; their only goal is to silence these “disinformationist” and “hoax-promoters” who are costing lives. (No one cares to ask: “Why would these doctors perpetuate a hoax about a vaccine and lose their job, and their career, and all their grant money, for something that brings them no benefit?”) Facebook extends the reach of its “fact-checkers,” a service funded by vaccine manufacturers to delete postings and accounts that put forth information not consistent with “the facts” that Big Pharma wants to promote. The corruption of science is widespread. Data is corrupt and agenda-driven. Scientists are silenced. “Trust the Science” is the new code word for “Shut the F* Up.” The message is clear: “Trust what we say. Don’t speak up. Be a good citizen and get the shot.”

This is a time of government-sanctioned book burning and witch hunting. The voice of people and medical doctors are shut down. TV hosts are trained to promote the pro-vax message and block, belittle, or distort contrary information. The grand debate regarding Covid-19, Covid-19 treatment, and vaccines is presented to the public through agenda-driven news networks but not by way of qualified doctors, who are allowed to openly debate the issues. The false and losing position of the government is never defended with truth or scientific studies because the best (and only) way to keep presenting a false narrative, and promote policies based on that false narrative, is to never debate the subject, never allow a dissenting voice to be heard, and to do everything possible to silence, obscure, discredit, and marginalize all those whose voices and opinions oppose the “settled silence.” Science settled by whom?—by politicians not by scientists.

Vaxcon 3

It is repeatedly made known that “vaccines” are not effective in preventing a person from getting or spreading Covid-19 yet injectees line up (for their shot and their booster) under the misconception that they are protected from the virus while the unvaxxed are not. Moreover, even though they are vaxxed and think they are protected they somehow believe they can still catch the virus from those who are unvaxxed but not from anyone vaxxed. Thus, at this point, there is only a pandemic of ignorance.

Riding upon the fear and ignorance of the masses, medical apartheid is further installed with a deep ethical and moral divide between the vaxxed and unvaxxed. NYC and other areas enact medical apartheid laws banning the unvaxxed from restaurants, shows, etc., NYC has a big propaganda celebration in Central Park to commemorate “the opening of New York”—for the vaxxed. (The forces of nature intervene and the event gets rained out and cancelled early.) The message being delivered is clear: only if you get vaxxed can you take part in normal society; and only then can we get back to our normal; so everyone must get vaxxed. Friends and families are divided by the new vax apartheid. Family members who have not been vaxxed are shamed and blackballed. Thanksgiving is not the same. Celebs like Nikki Manaj are attacked by every talking head on MSNBC and CNN (especially Joy Reid) because she said people should pray and do research and decide what is best for themselves rather than telling her 10 million followers to shut up and get the shot. How dare

someone like Nikki Manaj tell her followers to pray and do their own research? They're not smart enough to do that! The widespread blaming and demonization of the unvaxxed deepens. It's no longer fear of Covid, per se, its fear of the unvaxxed. As a popular meme states, "Never in history has the ineffectiveness of a medical treatment been blamed on those who have not received it."

The bastardization of science is nearly complete. Statistical lying is rampant. Science is no longer a tool for truth but a way to promote lies, false positions, and the vax. (The words of Mark Twain become increasingly clear: "There are lies, damn lies, and statistics.") "The science is settled" becomes the passive aggressive, head-in-the sand suppression tactic used to shut down all voices and all scientists who feel the science is not settled.

The only plan ever considered by the backroom policy-makers is "get the vax." A study comes out of Israel—which is one of the most vaxxed countries in the world—concluding that people who have had Covid-19 and recovered are seven to thirteen times more protected against breakthrough infection and symptomatic disease from Covid-19 and the delta variant than people who have been vaxxed. Thus immunizing people who have natural immunity will likely weaken their immune system making them more susceptible to future Covid-19 infections and infections from all variants. Vaxxing people who already have natural immunity is harmful to the individual and the population at large. One hundred million American are reported to have acquired natural immunity from having had Covid; vaxxing those people (thus making them more susceptible to future viruses) is going to cost tens of thousands of American lives. But all of this is ignored. The message remains unchanged: "The only way to save lives, and get back to normal, is to get *everyone* vaxxed." The idea of natural immunity—and how that is far more effective at protecting someone against Covid-19 and the delta variant than the vaccine—is dismissed outright. It is never mentioned or considered in any Covid-19 plan. No test for Covid-19 antibodies, to determine acquired immunity, is ever mentioned. (The American Red Cross used to test all donated blood for Covid-19 antibodies but once the vaccine came out they stopped; the rationale likely being that if people discovered that they had natural immunity they would be disinclined to get the shot.) Early treatment, especially with repurposed, not-patentable drugs is not only not considered but actively demonized and discredited by the propaganda machines of MSNBC and CNN. A highly effective drug, that has helped eradicate worm infestation in millions of human beings and earned its creators the Nobel Prize—for human use—and which has proven to be highly effective at binding spike proteins and thus preventing viruses from entering the cell—is never considered. No studies are ever cited or investigated. All we get from the great Rachel Maddow and her research team is that this wonder-drug is a dangerous "horse dewormer." The smirky suggestion is that only a nut job would take this drug and only a quack doctor would prescribe it for Covid-19 because it's a horse de-wormer. And to support their absurd claim they give us reports about some people who have died when self-administering this drug yet nothing about the many doctors around the world who are using it with great success. We all know if you give yourself a dose of a drug meant for a 1250 pound horse, which may be more than ten times the recommended dose for a human, there is a possibility of harm or death. Far more people die of unwitting overdoses from aspirin than from ivermectin but we never hear anything about that. All non-patentable drugs and non-profitable treatment options are systematically dismissed and discredited by the Big Business propaganda machine and the media they

control—because all of that threatens to get in the way of their vaccine agenda and the profit it generates.

Vaxcon 2

Vaccine mandates are put in place effecting hundreds of millions of Americans. People with natural immunity, who are more protected from the virus than those who have been vaxxed, are still mandated to be vaxxed anyway. The result of this being the likely loss of tens of thousands of American lives. Unvaxxed people are banned from public events, gyms, restaurants, certain stores, etc. People are forced out of work and their careers are ruined for refusing to get the shot. And, having been dismissed “with cause” they are denied severance pay and all unemployment benefits. More and more families are divided and isolated from each other. Untold misery is widespread due to vaccine-related injury and death yet the push for more vaccines and more boosters continues. Hospitals begin to fill up with vaxxers because of the many side-effects—but we never hear about any causality between receiving the vax and these sudden, unexplained illnesses. (And be careful to understand how statistical manipulation works: people who have received the vax are counted as unvaxxed until they get their second shot, and not until that shot has had time to take effect, which would be 10-14 days after their second shot. If they are admitted to the hospital thirty days after receiving the first shot, or say seven days after their second shot—from the ill-effects of the vax, or having contracted Covid-19, or for any another reason—they are listed as being unvaxxed. If a booster gets recommended, and a person does not get it in the given time frame, and he goes to the hospital, he goes back to being counted as unvaxxed.) Protests continue and more businesses are forced to shut down. The media is quick to blackout or “spin” any story that goes against the official narrative or involve vaccine mandate protests or walkouts. (Such is the case with the thousands of Southwest Airline flight cancellations—which was blamed on, of all things, bad weather.) High profile, fully-vaccinated public figures like Collin Powell are said to have died from “Covid complications” rather than from the ill-effects of the vaccine. Scientific reports, covering the prevalence of vaccine-related injury, are censored and put under “temporary removal” notice. (Robert Malone, MD, one of the originators of the mRNA vaccine comments: “I have never seen anything like this, ever, in my entire scientific career.”) Emergency approval sought, and granted, to inject children under the age of seven with the vax and to introduce the new Covid-19 vax as one of the dozens of vaccines children are required to take.

Vaxcon 1

Vaccine passports are required to leave your house, be in public, get any kind of medical service, travel, have a regular job, get government service such as a driver’s license, etc. An unvaxxed person is no longer entitled to medical insurance or Medicare. People’s every movement is traced and tracked with mandatory apps installed on their phones—“for their safety and the safety of others.” When going outside the unvaxxed must adhere an upside-down “V” their clothing so people can identify them and keep their distance. The unvaxxed are seen as putting their children at risk and are considered “child abusers” so their children are removed (for their safety) and put into child protective services. Forced quarantining of the unvaxxed becomes more aggressive with the set-up of internment camps. Finally, for everyone’s safety, government goon squads seek out and forcibly vax

people wherever and whenever they can be found. Vaccine passports must be updated every 6 months with proof that you received the booster shot else you lose your vax status and all the privileges that go with it and/or are then subject to forcible vaxxing. Protests and strikes escalate. Supply chains are further interrupted and there are widespread shortages. Marshall Law is regularly imposed. More people lose their work, suffer mental breakdowns, commit suicide, starve to death, and die of “medical complications.” All the ills befalling society are blamed on the unvaxxed, or the “vax hesitant.” They are the new lepers, the new “Jews” who get blamed for all the woes of society.

Since the covid vax campaign proved so successful, Big Government-Pharma begins plans for additional vaccination programs. Covid-19 had a death rate of less than 1% and was a mere “priming of the vaccine pump”; new vaccines for Marburg virus, and other deadly viruses, which have a mortality rate of over 80% are quickly developed—and will be ready just when they announce the possible Marburg pandemic. There will be no pandemic just the announcement that there could be one—with the proviso that the only way to avoid this looming crisis would be *for everyone to get the new vaccine*. All that they need to create this scare is a few cases of Marburg virus *reported* in the USA, the claim of asymptomatic spread, and some paid-off university to calculate a potential death total of 100 million Americans (which would be the case if everyone caught the virus—and this could only happen if *everyone* does not get vaxxed.) People go into fear-panic mode believing that there’s a deadly virus out there with an 80% chance they will bleed out and die if they catch it. Everyone and everything a person comes in contact is feared and seen as a deadly threat. Everyone is alienated from each other. To avoid this crisis and get back to “normal” people will be lining up to get the new vaccine. All of this will be based on fear and a fantasized death-rate projection, not on an actual pandemic. After the mad frenzy to get the new vaccine is over (and after the faithful have gotten their shots) the focus will shift to the unvaxxed or the vax-hesitant: and it will be for “your safety,” for the “good of all,” and for “national security” that *everyone* be forced to get the Marburg vaccine. Police and military squads will be called on to enforce this policy; people who do not comply will be dragged from their homes and forcibly vaccinated. And all the while, the vaxxed, in their fearful ignorance, condone all of this. ...

Once Vaxcon 1 is reached it is self-perpetuating and, thus, we will remain at Vaxcon 1. It marks the total control and zombification of the masses; the end of life, liberty, and happiness as we know it; the end of “America” as we knew it.

Study on Natural Immunity in Israel

<https://www.medrxiv.org/content/10.1101/2021.08.24.21262415v1>

“SARS-CoV-2 vaccinees had a 13.06-fold increased risk for breakthrough infection with the Delta variant compared to those previously infected, when the first event (infection or vaccination) occurred during January and February of 2021. The increased risk was significant for symptomatic disease as well. When allowing the infection to occur at any time before vaccination (from March 2020 to February 2021) evidence of waning natural immunity was demonstrated, though SARS-CoV-2 vaccinees had a 5.96-fold increased risk for breakthrough infection and a 7.13-fold increased risk for symptomatic disease.”
